RCA-7094...TOPS FOR GROUNDED-GRID IN SSB

RCA-7094 offers a remarkably simple way to build a medium power grounded-grid linear for SSB.

Because it is designed with an indirectly heated cathode, special filament chokes are not required. Most of the driving power appears as useful power in the output circuit so that high overall efficiencies can be achieved. Neutralizing, generally, is not necessary. "Swamping" resistors are not needed. A screen and bias power supply is eliminated, too.

For complete information on how to build an RCA-7094 grounded-grid linear...refer to RCA "Ham Tips," Vol. 19, No. 3, August, 1959 issue. For complete technical data on the 7094 in other classes of service, write to Commercial Engineering De-

partment, Section F-38-M, RCA Electronic Components and Devices, Harrison, N.J.
